
REVEL TOOL BOX COVER

Your cover comes with a permanent attachment option (velcro with peel and stick adhesive backing). If you wish to attach the cover and leave it on permanently then use the following instructions.

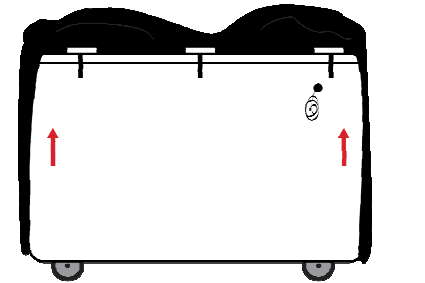

Instructions For Permanent Installation

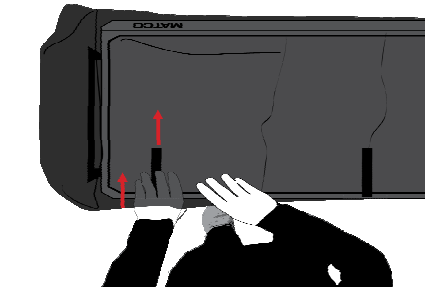

Unpack the cover and lay it on top of the tool box. Unzip all four zippers and fit the cover on the tool box.

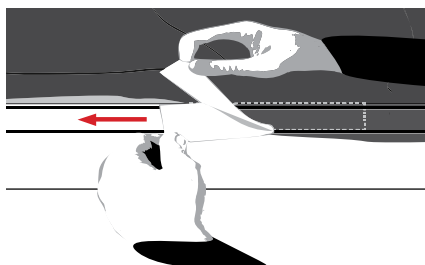

When the cover is properly aligned, place weights as shown on the top of the cover to keep it in place.

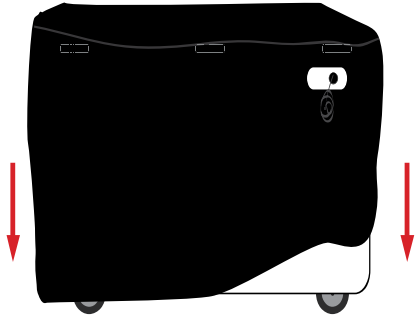

Lift the rear panel over the weights to expose the velcro attachment system.

If the 1" x 8" velcro straps are exposed, first lift the top of the cover slightly and slip the straps under the cover.

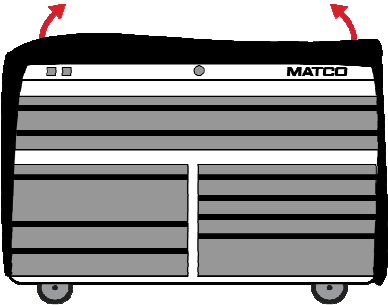

Secure the cover to the beveled edge of the tool box by first peeling the protective masking off the center velcro patch and sticking it to the tool box. Then using the same method continue to apply the remaining side velcro patches.

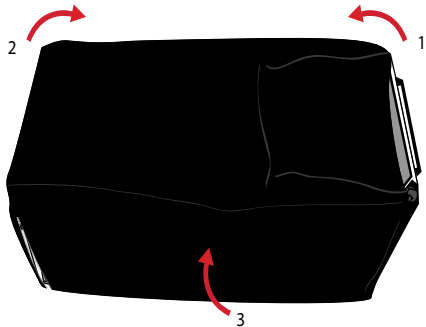

Remove the weights and place the power cord through the opening and let the rear panel fall into position.

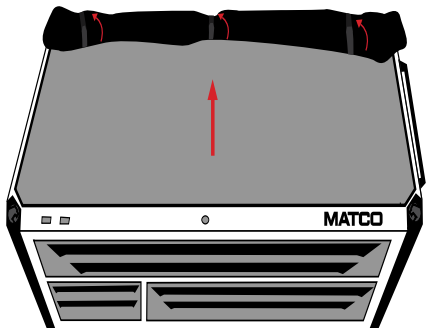

Accessibility Instructions

To access the front drawers, unzip the front two zippers and place the front panel on the top of the tool box.

To access both the front and side drawers, unzip all four zippers. First lay the side panels flat on the top of the tool box and then place the front panel on top of the tool box.

To access the top surface, roll the panels towards the rear of the tool box and attach the velcro straps to secure.
